
Project Manager & Design Engineer

Brock Ridgway, P.E.

Experience & Background

Brock has almost 24 years experience with increasing responsibility for the completion of planning, preliminary engineering, design, and inspection projects including roads, recreational paths, drainage, site and other civil projects. He has served as Project Manager of many successful projects for municipal clients.

Since founding Eagle Ridge, Brock serves his clients by assembling and leading project teams in the successful completion of infrastructure projects. He serves clients directly in the management, preparation and delivery of their projects. Over the years, Brock has completed over a dozen environmental documents. Combined with early years as an inspector and then as a designer, Brock has successfully completed over 20 federal-aid projects and is very well acquainted with INDOT's procedures for Preliminary Engineering, Environmental Documentation and Right of Way Acquisition.

Brock has obtained notable expertise in the conduct of public involvement programs, leading meetings, and with the detailed handling of utility coordination. These skills blend smoothly into a total service package, allowing Eagle Ridge to be a proficient steward of its client's projects.

Education & Certifications

B.S. in Civil Engineering, Rose-Hulman Institute of Technology

Masters in Business Administration, Indiana State University

Professional Engineer in Indiana

INDOT Level 1 LPA Certified, INDOT/FHWA NEPA Process Certified
